ACCELERATED ASSESSMENT

WHERE IT WORKS BEST

The Accelerated Assessment delivers maximum impact when the stakes are high and urgency is real.

- Cost reduction is a strategic imperative
- A persistent supply chain headache won't go away
- In-house domain expertise is unavailable
- 3rd party expert verification required
- Quality defects are reaching customers
- Resource constraints are limiting internal efforts
- PE portfolio value creation is in focus

IDEAL APPLICATIONS

Process Evaluations & Simplification

Identify where complexity, handoffs, or redundant steps are destroying throughput and driving up cost.

Operational Bottleneck Elimination

Pinpoint the single constraint limiting your capacity — then build the case to break it.

Cost Reduction

Cost reduction options identified, prioritized and implementation started

PE Value Creation

Validate the thesis, accelerate EBITDA improvement, and build an execution-ready 100-day plan.

THE PROCESS

From Kickoff to Roadmap in Four Focused Phases

Stage 1

Data Gathering & Visit Prep

- Gather & analyze data request items
- Review current KPIs and performance
- High-level data analytics for current-state insights
- Prepare with Client for a successful site visit

Stage 2

On-Site Process Walk & Interviews

- End-to-end process walk and process mapping
- Failure mode and root cause analysis
- interviews with key stakeholders
- Gather additional on-the-ground data
- Assess maturity across key operational dimensions

Stage 3

Analysis & Insights

- Evaluate improvement options and trade-offs
- Prioritize by impact, feasibility and urgency
- Identify quick wins vs. strategic initiatives
- Develop KPI improvement and cost/benefit projections

Stage 4

Opportunity Readout

- 3–5 high-impact improvement initiatives
- Top-level execution roadmap with priorities
- Brief report-out to key stakeholders
- Foundation for execution or further engagement
